

CLAIMS

What is claimed is:

1. A protective shield for a display unit screen comprising
a body,
a mounting clip coupled to the body adjacent an edge of the shield body, the clip comprising a clip body that is compressible and returnable to an uncompressed state and a locking member extending outwardly from the clip body.
2. The shield of claim 1 wherein the clip body comprises thin wall.
3. The shield of claim 2 wherein the wall is non-contiguous forming a lever arm from a portion of the clip body from which the locking member extends.
4. The shield of claim 3 wherein the lever arm includes a handle.
5. The shield of claim 1 wherein the locking member comprises a stepped face and a sloping face.
6. The shield of claim 1 wherein the clip body comprises a kidney bean shape.
7. The shield of claim 1 wherein the clip body comprises forward and rearward lobes.
8. The shield of claim 7 wherein the forward lobe comprises a rounded nose.
9. The shield of claim 8 wherein the locking member extends from the clip body adjacent to the base of the nose.
10. The shield of claim 1 wherein the clip body is releasably receivable in a predetermined groove formed about a periphery of a screen of a display unit.

11. The shield of claim 1 wherein the clip further comprises a base coupled to the clip body and the body of the shield.
12. The shield of claim 11 wherein the base is L-shaped.
13. The shield of claim 12 wherein a short leg of the L-shaped base abuts an edge of the body and a long leg of the L-shaped base extends inwardly from the edge of the body.
14. A mounting clip for display unit screens comprising a compressible body that is returnable to an uncompressed state, and a locking member extending outwardly from the body.
15. The clip of claim 14 wherein the body comprises thin wall.
16. The clip of claim 15 wherein the wall is non-contiguous forming a lever arm from a portion of the clip body from which the locking member extends.
17. The clip of claim 16 wherein the lever arm includes a handle.
18. The clip of claim 14 wherein the locking member comprises a stepped face and a sloping face.
20. The clip of claim 15 wherein the body comprises a kidney bean shape.
21. The clip of claim 15 wherein the body comprises forward and rearward lobes.
22. The clip of claim 21 wherein the forward lobe comprises a rounded nose.
23. The clip of claim 22 wherein the locking member extends from the body adjacent to the base of the nose.

24. The clip of claim 14 wherein the body is releasably receivable in a predetermined groove formed about a periphery of a display screen of a display unit.
25. The clip of claim 14 wherein the clip further comprises a base.
26. The clip of claim 25 wherein the base is L-shaped.
27. The clip of claim 26 wherein a short leg of the L-shaped base abuts an edge of a screen and a long leg of the L-shaped base extends inwardly from the edge of the screen.
